

*Unborn babies  
are human beings  
and can feel pain*

Watch an amazing 4D ultrasound video:  
[www.truthbooth.org/video.asp](http://www.truthbooth.org/video.asp)

***Fetal Development:***

- 3 weeks from conception – heart is beating
- 6 weeks – brain waves can be measured, baby responds to touch
- 8 weeks – all organ systems are present
- 9 weeks – baby can yawn and suck
- 10 weeks – has unique fingerprints
- 12 weeks – all organ systems are functioning, baby can smile

See documentation at [www.nrlc.org/abortion/](http://www.nrlc.org/abortion/)

*Love is not happy with evil,  
but is happy with the truth.  
Love never gives up;  
its faith, hope and patience never fail.  
1 Corinthians 13:6-7*

*Look at your  
ultrasound...*

*“A person’s a person,  
no matter how small.”  
~ Dr. Seuss*

***If you are in an abortion center right now, you can just leave.*** You don’t have to tell anyone inside. If you have already paid for the abortion, we can help you get that money back.

We understand that this is a difficult situation and we want to help you.

***Please come outside and talk with us, call 1-800-712-4357 or call the number below.***

## Possible Emotional and Spiritual Consequences of Abortion

*"I, too, was just like you – frightened, panicked and feeling all alone. Despite their claims, you know in your heart that what is growing inside you is your baby. Don't make the same mistake I made by letting today's temporary circumstances force you into a decision to kill your child, a decision that you will eventually regret. Abortion was not the answer. It was a cruel and permanent harm to my child, and it left me with shame, anger, self-hatred and hopelessness. Today you have help I never had. Listen to the real friend who gave you this brochure."*

## Physical Risks with Abortion

Suction abortion at 10 weeks  
With permission - Hayes Publishing Co., Inc.

- ✗ intense pain
- ✗ infertility
- ✗ problems with future pregnancies
- ✗ breast cancer
- ✗ death

*Having your baby is safer than having an abortion.*

See documentation at [www.afterabortion.org](http://www.afterabortion.org)

## Hurting from a past abortion?

Marcellis

Lina

These children are alive today because their parents changed their minds about abortion!

THOUSANDS of women have **NOT** kept their appointment with the abortionist.

## They have kept their babies instead!

Leslie & Lea

**You have the right to have your baby.**

Don't let anyone deprive you of the love of your son or daughter. When you are holding your baby in your arms, you will know you did the right thing. You will feel proud that you endured a tough situation and gave your child life!

(If you would like to talk about adoption, we can help.)

**Choose Life - Choose Love!**

## Early Medical Abortions (the "Abortion Pill")

Even if you've already taken the first drug (mifepristone, Mifeprex), your baby may survive and be born healthy. Don't take the second drug (misoprostol, Cytotec)!

**For help: 1-877-558-0333**

**or [www.abortionpillreversal.com](http://www.abortionpillreversal.com)**

*Kameryn survived an early medical abortion and is perfectly healthy!*

## Second and Third Trimester Abortions

No matter what the abortion center tells you, laminaria dilators CAN be safely removed by a competent doctor, preventing infection and allowing your pregnancy to continue normally. Likewise, if you have taken the drug Cytotec (misoprostol), your baby may still be alive. Let us direct you to a doctor who can help.

Mai Lee, Johnny and their daughter, Serena

*"Removing those laminaria dilators was one of the most important choices I have ever made in my life, and five months later a beautiful baby girl was born to me. Serena is such a joy in my*

*life and I thank God for blessing me with her. Each and every day Serena continues to be the example to our friends and family members of how precious life really is."*
