Robbinsdale Abortion Facility Closes after Five Decades!

by Debra Braun
Education Director

After 51 years of committing abortions and an estimated toll of more than 60,000 babies killed, the Robbinsdale Clinic closed its doors in late December! An internet company has a purchase agreement with the owner/abortionist June Fahrmann (see page 6) and has plans to demolish the building for a new data center, contingent upon final approval from the City of Robbinsdale which will most likely be in early March.

“We are very grateful to God that this blight in the city of Robbinsdale and, indeed, the whole of Minnesota, is now closed,” said Brian Gibson, CEO of Pro-Life Action Ministries. “So many lives have been lost at this location. So many women harmed. And yet, so many babies’ lives have been saved and so many families helped by our persistent presence, offering alternatives to abortion, throughout the decades.”

Based on a 1989 deposition from the late Romil Valgamae, the first abortionist at this location, the facility began as a family practice clinic in the early 1960s and began killing preborn children in 1973 shortly after the *Roe v. Wade* decision was handed down by the U.S. Supreme Court. The clinic continued to do some family practice until the end of

One of the first events conducted by Pro-Life Action Ministries outside the Robbinsdale abortion facility was this Father’s Day Rally in 1985.

This 1986 sit-in conducted by Pro-Life Action Ministries inside the Robbinsdale abortion facility waiting room and hallway was one of several “rescue missions” conducted there in efforts to peacefully halt the killing.

This beautiful little girl is one of the hundreds of babies saved from the Robbinsdale Clinic over the years.

2024, yet it was far better known in the Minneapolis/St. Paul area as an abortion facility.

Pro-Life Action Ministries began regular life-saving activities, including sidewalk counseling, at this location in the mid-1980s. Hundreds of lives have been saved in the last 40 years. In 1987, thirteen aborted babies (see photo, page 4) and patient records were found by a pro-life supporter in the unlocked dumpster behind the building. Pro-Life Action Ministries held a press conference and a funeral for these babies and then gave

them a dignified burial in Resurrection Cemetery in Mendota Heights, Minn.

The Robbinsdale abortion facility pushed back, suing Pro-Life Action Ministries several times. In early 1993 they obtained a permanent court order which somewhat restricted our sidewalk counseling there.

In 1992, the pro-life community opened a pregnancy resource center, the Robbinsdale Women’s Center (now Crystal Women’s Clinic), across the street, which

Guest Editorial

Impact of Florida's "Heartbeat Law" on the Front Lines

Editor's note — Abortions dropped 28% from 2023 to 2024 due to the state's "Heartbeat" law going into effect on May 1, 2024, according to the latest report from the Florida Agency for Health Care Administration. (A heartbeat law protects babies at the stage that their heartbeat can be detected, which is usually around six weeks gestation or four weeks after conception.) We have other indications that this law has saved lives, but some women go out of state to abort or perhaps receive abortion drugs in the mail. Tragically, the abortion numbers in Florida are still very high. In 2023, 84,052 abortions were reported, and in 2024, 60,755 were reported. In 2024, four babies were born alive following abortions, compared to 14 in 2023. The following article describes how ministry on the sidewalks has changed over the years in Florida where Pro-Life Action Ministries has a branch.

*by Michele Herzog
Central Florida Branch Manager*

Since moving back to my home state of Florida in 2010, much has happened concerning the battle for the lives of the youngest in our state.

For years, abortions in the Sunshine State were decriminalized up to 24 weeks (six months) in the womb. Florida was saturated with abortuaries and at one time the tri-county area of Palm Beach, Broward and Dade counties had 64 killing centers, the majority of which slaughtered babies up to six months.

In 2022, Governor Ron DeSantis signed a 15-week ban, which rid the state of the later-term abortions, but the majority of abortions had been committed prior to 15 weeks, so a horribly high number of babies continued to be slaughtered daily.

Then on June 24, 2022, the Supreme Court handed down the landmark *Dobbs* decision which held that the U.S. Constitution does not confer a right to abortion. The court's decision overruled both *Roe v. Wade* and *Planned Parenthood v. Casey*,

Pro-Life Action Ministries is an interdenominational Christian organization dedicated to publicly defending the sanctity of human life, and saving lives from abortion, infanticide and euthanasia now through peaceful direct-action and educational projects. It was founded in 1981 by Michael Gaworski, fbp, and Paul O'Donnell, fbp.

The Harvest is Plentiful, but the Workers are Few

by Gary Gillet

Sidewalk Counseling Manager

A young woman at the driveway of an abortion facility a while ago told our sidewalk counselor something like, “If abortion was truly murder, then there would be hundreds of people out here protesting.”

That is a difficult statement to argue against. Shouldn't there be many pro-lifers out at abortion facilities standing for the unborn children in danger of being aborted? The reality is that often we are struggling to get two or three people out on the sidewalks during a shift and some shifts only include one sidewalk counselor taking a stand, while the abortion facilities have pro-abortion “escorts” trying to keep moms from talking with us.

Fortunately, it doesn't have to be this way. Many of you may not be aware of our need for more volunteers. We would like to fill up all our openings in order to have a more impactful presence at the abortion facilities and to be able to save more unborn babies. Have you felt that God wants you to do more to save unborn babies? If so, you should follow that con-

viction.

That is how I decided to apply for and accept this job. I felt God putting this on my heart and when I was offered the job, I admit I wasn't really excited about it, but I had prayed that if God wants me to do this that He would offer me the job. When it was offered to me, I had a decision to make. Do I follow God's will or do I follow my will? I decided to follow God's will. Many times in my life I can honestly say that I did not follow my convictions or that still small voice in my heart, but this time I did.

I want to challenge each of you to consider if God is calling you to become a prayer supporter or a sidewalk counselor. Do you feel a conviction to do something to help stop the arguably greatest injustice of our lifetime — the killing of innocent unborn children created in the image of God and each with a purpose from God? If you do, please follow God's leading and volunteer with us. Every child deserves to have someone care about them and being a prayer supporter or a sidewalk counselor provides them some of the dignity, care and love that they deserve.

If you are retired or able to give one or two hours during the week we have openings every day, Monday through Friday, from 7:30 a.m. until 5:00 p.m., depending on the location. If weekdays conflict with your schedule we also have openings on Saturdays. There are 168 total hours in a week; can you spare just two hours for these unborn children?

If we could fill all our shifts with the prayer supporters and the sidewalk counselors that we feel are ideal, what an impact we would have. The abortion facilities would notice and be greatly concerned. Those who live in the neighborhoods where the abortion facilities are would notice and be informed of what is happening there. God would notice and use us even more. I cannot imagine what God would do if we really committed ourselves to protect life, but I would love to see it.

If you are interested in becoming a sidewalk counselor or prayer supporter, would like more information, or would like to attend our spring training seminar, please contact me: gary.gillet@plam.org or (651) 797-6366. Thank you for being supporters of Pro-Life Action Ministries and of life. God bless you all.

Impact of Florida's Heartbeat Law (from page 2)

returning to the federal and state legislatures the power to regulate abortion.

Many states surrounding Florida furthered limited abortions or rid their state of this barbaric act. Thus, Florida became a “haven” state for abortion, with women coming from Texas, Alabama, Mississippi, Tennessee and many other states to kill their innocent little baby boys and girls.

The abortuaries were packed, with a huge proportion of women coming from out of state and the numbers of abortions skyrocketing, to our dismay and sadness. Then on May 1, 2024, the “Heartbeat Law” went into effect, which halted the huge amount of abortion-bound women pouring into the state of Florida to kill their babies. But as time has gone on since then, we sidewalk counselors have noticed that the women are in a very big hurry to commit abortions!

We've had to change strategies at

reaching the women, who are colder, angrier and much harder to reach! It truly has been an obstacle and a huge difference in ministering the truth about abortion, help and hope to them.

Witnessing women so determined to get their children killed has been tragic to watch; however, we have not let this stop us in continuing to reach out and speak up for those little ones who have no voice. And, thank the Lord, within the last couple months, we've had a number of babies saved despite the obstacles in reaching these women in such a hurry to pay an abortionist to snatch the life of their innocent children.

Yes, Florida has gone from abortions up to 24 weeks of pregnancy to up to about 6 weeks. We have had to make adjustments in trying to rescue those little ones unjustly sentenced to death, no matter how old or young in the womb.

But the numbers of abortions are still

staggeringly high in our state unfortunately.

Our prayer continues to be that the unborn will be set free, with the same rights as you and I — the rights to life, liberty and the pursuit of happiness. Until then, we press forward, make adjustments, and continue to speak up for the young babes at the modern day places of Molech, in Jesus name.

Sidewalk Counseling News

To receive our other newsletter, *Sidewalk Counseling News* (either via e-mail or regular mail), published three times a year and filled with sidewalk counseling tips and resources for pro-life activists anywhere in the world, contact debra.braun@plam.org. Free brochure samples upon request.

Abortions Continue to Increase in Minnesota

For about 10 years, the number of babies killed annually in Minnesota was around 10,000. Although we wish NO babies were killed, this was a 48% decrease since the all-time high in 1980 when nearly 20,000 babies were killed. This all changed in the last two years.

The 2023 abortion report from the Minnesota Department of Health showed that 14,124 preborn children were killed in Minnesota in 2023, an increase of 16% from 2022 and of 39% from 2021. This occurred after some of the nation's most extreme pro-abortion laws were passed

Robbinsdale Clinic Closes! (from page 1)

has saved many, many lives. In 1998 we bought the property next door, using the back yard to assist in our sidewalk counseling efforts and eventually turning the building into our Chapel of the Innocents where more prayer was conducted in addition to the weekly Saturday morning prayer led by Fr. Thomas Dufner outside that abortion facility which had been conducted since the early 1990s and continued through 2024. (They are now praying outside Planned Parenthood in St. Paul.)

We held a 40 Days for Life there, plus several Caroling for Life events and many other prayer rallies, some of which featured national pro-life leaders.

Besides the killing of preborn babies, other evil practices took place in this

building. A long-time employee of this facility eventually had a change of heart and left. She has since passed away, but shortly after she left, she told me that there was a special drawer inside one of the offices where some of the cash payments were secretly kept hidden and unreported to the IRS. (She said the clinic would tamper with its appointment records to make it look like some of the abortion clients had not shown up when in reality they had.) She also told me that after the state fetal disposal law was passed (partially due to the body find there), the larger babies were kept in the attic until a funeral home picked them up. When I questioned Fahrmann about this one day, she didn't answer, but shortly

afterwards, I received a call from this former employee who told me that Fahrmann had contacted her, warning her to keep quiet.

The Whole Woman's abortion facility in Bloomington has gotten busier since Robbinsdale closed; apparently with some clients having been referred there by the Robbinsdale facility. This is not surprising because the founder of the Whole Woman's chain, Amy Hagstrom Miller, worked as a "counselor" at the Robbinsdale facility nearly four decades ago at the start of her abortion "career."

Watch for our Memorial Service to be held outside the Robbinsdale Clinic soon. Our previously scheduled service for February 8 was postponed due to a snowstorm which prevented parking in the area.

The largest baby found on January 13, 1987 was named Michael Allen by Br. Paul O'Donnell, co-founder of Pro-Life Action Ministries. His body was completely dismembered (his crushed head is on the right.) According to measurements and this fetal model, Michael was at least 16 weeks old when he was brutally killed.

Scores of both pro-life and pro-abortion supporters were present on the sidewalks near the Robbinsdale abortion facility on Saturdays in 1992, even as sidewalk counselors continued to reach out to the abortion clients. Then a court order eventually limited the number of people from either side near the driveway and in the immediate area.

Babies Saved

We have documented five babies already saved in 2025, making 3734 babies saved since the ministry began in 1981! To read some of these stories, go to www.plam.org and click on "Babies Saved." We have also had many "hopeful" baby saved situations so far this year, including at the Uptown (Mpls.) PP, St. Paul PP, Whole Woman's, and RRWC in Moorhead.

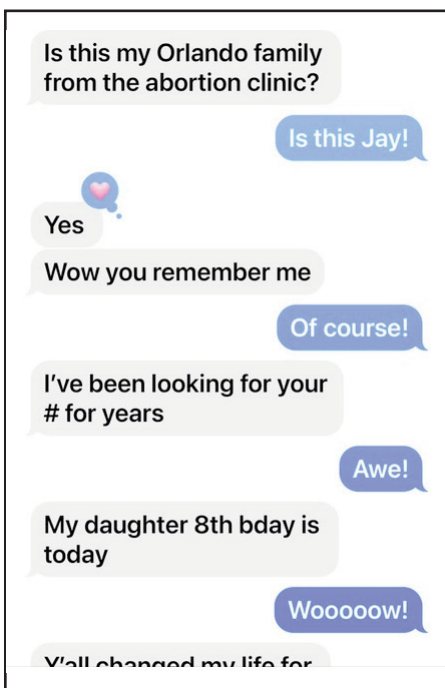

Long-Term Rewards of Sidewalk Counseling!

Story One

by Michele Herzog
Central Florida Branch Manager

I thank the Lord when we receive messages like this (see screenshot below) from former abortion-bound parents (Jay is the father of this baby saved). It just touches my soul, and encourages me to continue on speaking up for those who have no voice and trying to rescue innocent young babes from the barbaric act of abortion.

This particular couple had come to the now-closed EPOC abortuary almost nine years ago. Deanna and I were out ministering there, and God gave us the oppor-

tunity to reach out to them, and the rest is history. We were able to drive up to Jacksonville where they live, see the baby who had come so close to death, and visit with them.

God truly is so good and I praise HIS HOLY name.

Abortions Up (from page 4)

by the Minnesota Legislature in January 2023, allowing abortions up to birth and repealing pro-life regulations such as informed consent for the pregnant woman and funding for pro-life pregnancy resource centers to assist mothers and babies, particularly those in poverty.

These new laws also provided more tax funding for abortions and repealed protections for babies born alive.

The 2023 number was a 20-year high. And the abortion rate among Minnesota residents rose to 10.1 (abortions per (continued on next page)

Photo by MCCL

Tragically, Minnesota Citizens Concerned for Life had to add about 2000 fetal models this year to their powerful display representing the number, ages and ethnicities of the babies annually killed by abortion in the state at their March for Life held on January 22.

Pray for . . .

June Fahrmann

The abortionist (and owner) of the recently closed Robbinsdale Clinic (see page 1) was June Fahrmann, 72, who spent nearly all her working life in the abortion industry. She started working at the Robbinsdale Clinic as a medical assistant in 1977, became head of the abortion practice there in the mid-1980s, and then went to medical school in the mid-1990s, specializing in family practice and becoming an abortionist at this facility. She eventually bought the clinic from the previous abortionist. Although the abortion “business” had decreased somewhat at Robbinsdale in recent years, in 2012, Fahrmann was the highest-volume abortionist in Minnesota, killing 1111 preborn babies that year alone.

Although Fahrmann has closed her abortion facility, she has not had a change of heart. Please pray that she and all her former co-workers (and the escorts there) would repent of their involvement in abortion, seek forgiveness from Christ, and spend the rest of their lives helping to save babies.

Listing Abortionists

A hallmark of our ministry has been confronting the evil of abortion with the love of Christ. This approach has included publicly identifying who the abortionists are. The practice of placing the names of abortionists in this

newsletter has a twofold purpose: to ask for your heartfelt prayers for their conversion and to inform you so that you are not patients of those committing abortions. We have resoundingly condemned any sort of physical or psychological threats to anyone involved in abortion. Our desire is for the love of God to permeate the lives of those associated with abortion, that they will turn away from the harm they inflict and become followers of Christ as so many before them have done. Please pray for the following:

Minnesota

Julie Amaon, Carol E. Ball, David Baram, Christy Boraas-Alsleben, Kristi Borowski, Robin Bresette, Thomas F. Is Your Doctor Involved in Abortions? Does Your Doctor Prescribe Abortifacient Birth Control?

Ask your doctor if he/she does abortions or refers for them, or prescribes abortifacients such as the Pill, Ortho Evra (the “patch”), Depo-Provera (the “shot”), Nuva-Ring, the “morning-after pill,” implants, or the IUD. All these methods (and others) can cause very early abortions by thinning the lining of the uterus so that if breakthrough ovulation occurs (which is possible) and a new life is conceived, the young human being may not be able to attach to the uterine lining and therefore he or she dies. These methods can also be very dangerous, even deadly, to the woman. If you would like the names of completely pro-life physicians, see www.onemoresoul.com/nfp-directory. In Minnesota, you may also call our office at (651) 771-1500.

Natural Family Planning

For information about the safe, effective and morally acceptable methods of *Natural Family Planning (NFP)*, contact One More Soul at: 1-800-307-7685 or www.onemoresoul.com. One More Soul has many resources to help people understand how children are a great blessing from God and how contraception is very harmful to women, and their marriages, and consequently to families, Church and society.

Regular Prayer Times Outside the Abortion Centers

Join a group below or start your own prayer time outside an abortion center. We strongly encourage prayer groups from all denominations. If you would like to have your group listed here, contact Debra Braun at (651) 797-6364.

Babies Saved (from page 5)

ceries in the van at a parking lot when a van pulled up in front of me. As I turned my head, there was Jamice! She greeted me with a smile. I went over to give a hug when she opened the side door of her van and out jumped a beautiful seven-year-old girl. Jamice looked at me and said, "She's the one you saved."

I cannot express the joy of seeing her! But I responded, "It wasn't me, but it was God that saved her." Jamice just said, "But you were there to help me."

I cried with tears of thanksgiving all the way home. This was humbling and very amazing. Just to think, a precious life saved through the work of prayer and obedience — to be at a place that no one wants to be at because it is dark and evil. Yet God has called and lives are saved.

Abortions Up (from page 6)

1,000 women of reproductive age), a 9% increase over 2022 and a 20% increase since 2021, according to a December 31 press release from Minnesota Citizens Concerned for Life (MCCL).

In 2023, the Democrat-controlled legislature also changed the abortion reporting law, so that abortionists no longer have to report the reasons women gave for having abortions and any post-abortion complications. They also do not have to report the number of babies born alive after an abortion and what happened to these infants. In recent years, as many as five children annually have been *reported* as born alive and left to die. Now the public is left completely in the dark regarding born-alive infants and the reasons for abortions, which according to much research over the years, is, in nearly *all* cases, social or financial reasons.

The 2023 report showed a 48% increase in the number of non-Minnesota residents having abortions in Minnesota (2,980 abortions). The abortion pill accounted for 65% of abortions in the state. Three hundred babies were killed at 20 weeks or later, which was a slight increase over 2022, but a 35% increase over 2021. The latest abortion reported in 2023 was at 29 weeks. However, the gestational age was not reported for 208 abortions.

Good Friday Volunteers Needed!

Volunteers (men and women, ages 18 and over) are needed for 3-hour shifts to help with our Good Friday vigil, both at the parking ramp at the University of St. Thomas and at the vigil site outside Planned Parenthood. (First Aid/ First Responders: If you are an RN/LPN/EMT or a physician, please contact us.) To sign up, contact Brian Walker at brian.walker@plam.org. Thank you!

*Sign up for
Sunday Updates!*

If you are not already receiving our very informative, but brief, weekly e-mails called "Sunday Update," send us your e-mail address and we'll add you. Or go to www.plam.org/newsletter to sign up online. You don't want to miss these important updates which include timely material that we do not have room to cover in this bi-monthly newsletter. Recent Sunday Updates have also included a fascinating series on the development of the baby in the womb with information from the scientific website: www.ehd.org.
